B-Series Ironing Board

B25HV Professional Ironing Board

A standard ironing board can quickly become damp during continuous use, making it difficult to achieve a clean, crisp finish. The SEVE B25HV is a flexible, cost-effective alternative to a full industrial ironing table, offering a clear upgrade over a standard board.

Its heated surface and powerful vacuum extraction keep the board dry, draw steam through the fabric, and improve finishing results across a wide range of garments. Ideal for laundrettes, guest houses, boutique hotels, hotel laundries, and dry cleaners, it delivers professional performance without the size or cost of a larger unit.

Key Features

- Heavy-duty build for excellent stability.
- Heated surface for dry, crisp finishing.
- Powerful vacuum extraction removes steam quickly.
- Laundry tray for convenience.
- Includes water bottle holder for compatibility with boiler or gravity-feed irons.
