B-Series Ironing Board

B70HV Professional Ironing Board

The SEVE B70HV is a larger, more heavy-duty ironing board for commercial laundries, hotels, garment factories, and dry cleaners that need a more professional finishing setup.

Its heated board stays dry during longer ironing periods and helps remove creases more effectively. The built-in vacuum extraction holds garments in place and pulls steam and moisture through the fabric for a cleaner finish. A sleeve arm makes it easier to iron sleeves, cuffs, shaped sections, and other awkward areas. The B70HV ironing board is well suited to busier operations that need dependable performance and a consistent finish across different garments.

Key Features

- Bigger board for quicker turnaround and higher-volume finishing.
- Heated surface for dry pressing and crisp, professional results.
- Strong vacuum extraction for rapid steam removal and better fabric control.
- Sleeve arm (heated) for neat finishing on hard-to-reach garment areas.
- Solid heavy-duty build for dependable all-day performance.

Essential Data

- Weight: 70kg
- Ironing Area (mm): 1200 (l) x 390 (d)
- Heating Power: 1300W (Board) / 350W (Sleeve Arm)
- Steam Extraction: 500W (2800 r/min)
- Warranty: 12-months
