T-Series Ironing Table

T80HV
Professional Ironing Table

Laundries and dry cleaners lose time when moisture stays in the fabric, when creases need a second pass, and when sleeves need separate handling. The SEVE T80HV ironing table removes those delays. A 1000W heated table and 800W vacuum pull steam and moisture through the fabric as it is pressed, so creases set in one pass and items come off drier, ready to fold or hang sooner. The 1520 x 800mm ironing area supports large garments and flatwork, so operators spend less time repositioning. A heated sleeve arm is fitted as standard, so sleeves, cuffs and shaped sections are finished without a separate station.

Key Features

- 1000W heated table. No separate steam or gas supply to install or maintain.
- 800W vacuum extraction. Drier, flatter finish in one pass, less rework.
- 450W heated sleeve arm. Sleeves, cuffs and shapes set on one table.
- 1520 x 800mm ironing area. Fewer repositioning stops on large garments.
- Single phase 220V. No three phase upgrade, max load about 2.25kW.

Essential Data

- Weight: 80kg
- Ironing Area (mm): 1520 (l) x 800 (d)
- Heating Power: 1000W (Board) / 450W (Sleeve Arm)
- Steam Extraction: 800W (2800 r/min)
- Warranty: 12-months
